

# Automated Commercial Environment—Requirements Recommendation

<b>Date:</b>	May 15, 2001
<b>Number:</b>	BUS-004-HL
<b>Requestor:</b>	Business Applications of Technology Subcommittee
<b>Customs Co-Chair:</b>	(signature)
<b>Trade Co-Chair:</b>	(signature)

## Requirement

Provide access to data content independent of data presentation in a common representation to eliminate data redundancy. Support role protected data at the application level.

## Business Need

Support flexibility for business users to share and access data through a common representation

## Technical Need

Simplify data access and data management by interacting with a single source.

### Related Technology Areas:

Data architecture  
Data management  
Data standards  
Security infrastructure

## Benefits

Provide a standard to support data interoperability.

## Risks

Identification of a stable, common standard.
